Subject: Nuclear Waste Shipments

Part of Records Package / Supplement / Correction

Attention: Carol Hanlon
Department of Energy

Re: Shiping Nuclear Waste

Why gamble with millions of lives? Leave nuclear waste where it originated and stop producing it till we have sites that are updated and fortified for safety. The benefits simply do NOT outweigh the risks. The time span of thirty years is too risky not to mention how easily it could be abused, heaven forbid, by terrorists.

I'm not an intellectual but it only takes common sense to figure this one out.

Sincerely, Diane Sperber
Webster Groves, Missouri
